

LET'S GO A-LETTERING

A. It's amusing to invent designs and logos, and in some cases it can even be profitable. Let's see what you can do with some simple designs. Putting two numbers or letters together can be effective. For example, here are two sevens and two As.

1. Select any three letters of the alphabet. Then take two of each letter and attach the pair together, in any way you like, to make a simple design.

2. Look at those three designs above and make three more of the same letters that are quite different.
