Educating Emerging Entrepreneurs

What Do Educators
Mean By
Hands-On Activities?

Here Are Some Examples...

- ◆ Firefighters have had kids try on some of their equipment - and try to move in it.
- ◆ A landscape designer plotted the students on an imaginary landscape where they became short bushes, tall trees and low-growing perennials as he described the principles of his craft.
- ◆ Law enforcement personnel took an 'alleged criminal' in to book 'em - fingerprints included!
- ◆ After explaining the need for chemistry in the Cosmetology field, the presenter allowed students to put a streak of washable color in their hair.
- ◆ A business owner had students help her put together a brief 'business plan'.

Use your imagination! Have fun!
And if you're really stuck, call
your Marketplace for Kids
organizer for some ideas!
