Lunch: Students may bring a sack lunch, or purchase lunch from Dakota College for \$4.00. Lunch from Dakota College will include a sloppy joe, chips, salad, rice crispy bar, and choice of milk or juice. Pre-registration for lunch is required. Checks should be made payable to Dakota College and paid for in the lunch line. Sack lunches can be stored in the gymnasium.

Class A: Friends of the Forest.

Trees and forests give us many products that improve our lives. We use forest products for food, building materials and paper. Selling special forest products is an opportunity to earn extra money while providing a useable product that doesn't hurt the environment. Special forest products may include food like fruits and nuts; decorative items like Christmas trees and flowering branches; craft products like bird feeders and potpourri; medicines and herbs; or woody biomass for fuel. Participants will make and take home a bird feeder made from a pine cone.

Class B: How Drugs "Operate" in the Body.

Become an amateur doctor as you help the presenter by operating on the patient and exploring the effects of drugs throughout the body. Learn the difference between medicine and illegal drugs, and how you can keep yourself safe.

Class C: Mooove Over, the Animal Doctor Is In.

Learn what a veterinarian does on a day to day basis.

Class D: You've Got the Dollars, Have You Got the Sense?

Knowing how to manage your own money will give you a huge boost in the world of business. And you can start NOW! You need a good foundation of how to plan a budget (and stick to it!) that includes spending, saving and investing, and giving. With that knowledge, tackling business expenses and income, pricing of products and services, and many other things will be easier for you and you'll be more successful!

Class E: Wired for Success!

Fast growing sites like Facebook, Twitter and YouTube are taking the net by storm. They're fast, free, and best of all, fun! But did you know they can be used for more than talking with friends? In this class we will show you how to use networking sites to start your very own business and how to stay safe while doing it. So take a trip with us through cyber space. The destination is your future!

Class F: Emergency! Call Us At 911

Police, firefighters and others respond to emergencies on a daily basis. Do you have what it takes to join them? Attend this class to hear stories from their work day, and see equipment they use, and the unlawful things they find.

Class G: Greenhouse Tour.

Who said you cant grow bananas in North Dakota? Take a tour of this greenhouse and be totally amazed by all the wonderful things you see!

Class H: Build-a-Bot. A Robot That Is!

Hurry up and gather 'round for a chance to see the coolest robots in town! Step into our robotics laboratory and learn all about robots. We'll teach you how a robot works and how you can set up a robotics team at your very own school. You'll even get a chance to touch and see a real working robot. You won't want to miss this class!

Class I: Blast Off with Biofuels.

Imagine powering a car, boat or airplane with something that you grew in your garden. Does it sound too good to be true? People do it every day with the help of biofuels. Biofuels are fuels that come from plants and other natural sources. Race car drivers use them every day and chances are so do your friends and family. This class will help you learn all about biofuels. You might be the future inventor of a super biofuel that will power the race cars of tomorrow!

Class J: 119 Fun and Exciting Business Ideas!

Do you like to make money? Do you like to have fun? If so, this is the class for you. Making money can be exciting and rewarding if you know how to do it. Join our class and we will teach you 119 exciting things that you can do to make money.

Class K: Drums Away

Get moving with this upbeat class! Want to learn some new moves, burn some energy, or just have a great time? Join in as our instructor teaches you how to stay in shape and have fun doing it. **Warning: This class contains music, dance, rhythm, and may cause excitement!**

Class L: Target Balken.

Location.... The Bakken formation in the Williston Basin. Your mission.... You must navigate through 200,000 square miles of rock reaching a depth of 130 feet and extract your target. Oil! The mission you are about to accept is difficult. You will be briefed for this mission by our Bakken formation expert. You will be taught about geology, oil, drilling and the knowledge you need to successfully locate and extract your target. If you choose to accept this mission sign up today!

Class M: Blow Wind, Blow (Part 1).

Do you know where your electricity is coming from? With a press of a button or a flick of a switch, electricity powers our TV's, computers and air conditioners--to mention a few. Learn about renewable energy, electricity basics and wind energy. This will class will blow you away!

Kid Wind (Part 2).

Did you know that North Dakota is the windiest state in the United States? It is! What can we do with all that wind? Wind has the power to shape the face of the earth. People use wind to sail kites, push boats and sometimes surf! We can even use wind to make electricity for entire cities. In this class we will see how we can use wind to make our lives easier. Join us to learn about wind turbines, wind farms and more!
