Lunch: Students may bring a sack lunch, or purchase lunch from Lake Region State College for \$4.00. Lunch from Lake Region State College will include a choice of chicken burger or sloppy joe, assorted chips, tossed salad with dressing, pickle spear, cookie and choice of milk or juice. Pre-registration for lunch is required. Checks should be made payable to Lake Region State College and paid for in the lunch line. Sack lunches can be stored in the Dining Room.

Class A: Friends of the Forest.

Trees and forests give us many products that improve our lives. We use forest products for food, building materials and paper. Selling special forest products is an opportunity to earn extra money while providing a useable product that doesn't hurt the environment. Special forest products may include food like fruits and nuts; decorative items like Christmas trees and flowering branches; craft products like bird feeders and potpourri; medicines and herbs; or woody biomass for fuel. You will even get to make and take home a pine cone bird feeder!

Class B: How Drugs "Operate" in the Body.

Become an amateur doctor as you help the presenter by operating on the patient and exploring the effects of drugs throughout the body. Learn the difference between medicine and illegal drugs, and how you can keep yourself safe.

Class C: You've Got the Dollars, Have You Got the Sense?

Knowing how to manage your own money will give you a huge boost in the world of business. And you can start NOW! You need a good foundation of how to plan a budget (and stick to it!) that includes spending, saving and investing, and giving. With that knowledge, tackling business expenses and income, pricing of products and services, and many other things will be easier for you and you'll be more successful!

Class D: Wired for Success!

Fast growing sites like Facebook, Twitter and YouTube are taking the net by storm. They're fast, free, and best of all, fun! But did you know they can be used for more than talking with friends? In this class we will show you how to use networking sites to start your very own business and how to stay safe while doing it. So take a trip with us through cyber space. The destination is your future!

Class E: KidWind.

Did you know that North Dakota is the windiest state in the United States? It is! What can we do with all that wind? Wind has the power to shape the face of the earth. People use wind to sail kites, push boats and sometimes surf! We can even use wind to make electricity for entire cities. In this class we will see how we can use wind to make our lives easier. Join us to learn about wind turbines, wind farms and more!
(This class will be 2class periods.)

Class F: Build-a-Bot. A Robot That Is!

Hurry up and gather 'round for a chance to see the coolest robots in town! Step into our robotics laboratory and learn all about robots. We'll teach you how a robot works and how you can set up a robotics team at your very own school. You'll even get a chance to touch and see a real working robot. You won't want to miss this class!

Class G: Blast Off With Biofuels.

Imagine powering a car, boat or airplane with something that you grew in your garden. Does it sound too good to be true? People do it every day with the help of biofuels. Biofuels are fuels that come from plants and other natural sources. Race car drivers use them every day and chances are so do your friends and family. This class will help you learn all about biofuels. You might be the future inventor of a super biofuel that will power the race cars of tomorrow!

Class H: 119 Fun and Exciting Business Ideas!

Do you like to make money? Do you like to have fun? If so, this is the class for you. Making money can be exciting and rewarding if you know how to do it. Join our class and we will teach you 119 exciting things that you can do to make money.

Class I: Take a Tour of Your Future.

Come take our tour and see what your future career may be. Take a look at what a Highway Patrol officer, a mechanic, a nurse, or a simulator technician does every day. See how you can get the education to get the job of your dreams.

Class J: The Secrets of Sullys Hill.

Bison, Elk and Deer, oh my! Yep that's right. There are creatures big and small sitting on Sullys Hill at this very moment. Do you know what they are doing? We do! Join our class as we explore the secrets of Sullys Hill and learn about the plants and animals that live there. Learn all you can because someday you might be in charge of taking care of Ol' Sullys creatures!
