

REGION 5 MARKETPLACE FOR KIDS EDUCATION DAY
WEDNESDAY, MAY 5, 2010, 9:15 A.M. – 2:00 P.M.
CONCORDIA COLLEGE, MOORHEAD, MN
General Schedule of the Education Day

A personalized schedule will be created for each student, and will be printed on their name badges and sent to each teacher with their registration packet. Pre-Opening Rally Entertainment will begin at 9:00 a.m., with the Opening Rally beginning at 9:15 a.m.

Lunch: Students may bring a sack lunch, or purchase lunch from Concordia College for \$4.25. Lunch from Concordia College will include a Cobber Joe, chips, apple, chocolate chip cookie and milk. Pre-registration for lunch is required. Checks should be made payable to Concordia College and paid for in the lunch line. A storage area will be available for sack lunches. **West Fargo Public Schools and Fargo Public Schools: Please contact your Marketplace for Kids coordinator to inquire about lunch arrangements.**

Class A: How Drugs "Operate" in the Body

Become an amateur doctor as you help the presenter by operating on the patient and exploring the effects of drugs throughout the body. Learn the difference between medicine and illegal drugs, and how you can keep yourself safe.

Class B: You've Got the Dollars, Have You Got the Sense?

Knowing how to manage your own money will give you a huge boost in the world of business. And you can start NOW! You need a good foundation of how to plan a budget (and stick to it!) that includes spending, saving and investing, and giving. With that knowledge, tackling business expenses and income, pricing of products and services, and many other things will be easier for you and you'll be more successful!

Class C: Wired for Success!

Fast growing sites like Facebook, Twitter and YouTube are taking the net by storm. They're fast, free, and best of all, fun! But did you know they can be used for more than talking with friends? In this class we will show you how to use networking sites to start your very own business and how to stay safe while doing it. So take a trip with us through cyber space. The destination is your future! *(This class utilizes social networking sites such as Facebook.)*

Class D: KidWind.

Did you know that North Dakota is the windiest state in the United States? It is! What can we do with all that wind? Wind has the power to shape the face of the earth. People use wind to sail kites, push boats and sometimes surf! We can even use wind to make electricity for entire cities. In this class we will see how we can use wind to make our lives easier. Join us to learn about wind turbines, wind farms and more! *(This class will be two class periods. At the request of the presenter, this class size will be limited.)*

Class E: Build-a-Bot. A Robot That Is!

Hurry up and gather 'round for a chance to see the coolest robots in town! Step into our robotics laboratory and learn all about robots. We'll teach you how a robot works and how you can set up a robotics team at your very own school. You'll even get a chance to touch and see a real working robot. You won't want to miss this class!

Class F: Blast Off with Biofuels.

Imagine powering a car, boat or airplane with something that you grew in your garden. Does it sound too good to be true? People do it every day with the help of biofuels. Biofuels are fuels that come from plants and other natural sources. Race car drivers use them every day and chances are so do your friends and family. This class will help you learn all about biofuels. You might be the future inventor of a super biofuel that will power the race cars of tomorrow! *(At the request of the presenter, this class size will be limited.)*

Class G: 119 Fun and Exciting Business Ideas!

Do you like to make money? Do you like to have fun? If so, this is the class for you. Making money can be exciting and rewarding if you know how to do it. Join our class and we will teach you 119 exciting things you can do to make money.

Class H: Friends of the Forest.

Trees and forests give us many products that improve our lives. We use forest products for food, building materials and paper. Selling special forest products is an opportunity to earn extra money while providing a useable product that doesn't hurt the environment. Special forest products may include food like fruits and nuts; decorative items like Christmas trees and flowering branches; craft products like bird feeders and potpourri; medicines and herbs; or woody biomass for fuel. Participants will make and take home a bird feeder made from a pine cone. *(Students will be working with peanut butter. At the request of the presenter, this class size will be limited.)*

Class I: "Positive" Motion Fitness Fun.

Positive Motion is "movement with a message." Put the fun in fitness through awesome hip hop and jazz moves while learning about health, fitness, and "groovin'" to your positive motion beat.

Class J: Your Dreams, Math and How to Manage Your Money!

Everyone dreams! We dream about being teachers, doctors, gamers, engineers, attorneys, business owners, farmers, movie stars, and rock stars. Your dreams will change the world! This interactive class will give you a glimpse of how to start reaching for your dreams today --- and as a bonus you will learn how simple math will help you manage your money --- forever.

Class K: YOUR Help is Wanted!

There are many different kinds of jobs. Which ones are a good match to you? Using checklists, you will interview other students for jobs and be interviewed yourself. Together, you'll guess what occupation fits each checklist and then find it on the colorful "World of Work" poster, where jobs are placed among the four primary tasks of working with people, things, ideas, and data. You will compare jobs and share where you fit best in the world of work.

Class L: Tennis Anyone?

Learn what it's like to play tennis from a professional! This class will include actual time on the tennis court! This class activity will be held rain or shine! *(At the request of the presenter, this class size will be limited.)*

Class M: Hair We Go!

Come to this class and learn about careers in cosmetology. When you leave, you may even have a different hair color!

Class N: Concerts, Roller Coasters, and Cotton Candy.

Take a peak inside the planning, marketing, volunteer recruitment, sponsorships, entertainment booking, and contracting of food vendors at the Red River Valley Fair.

Class O: Doggie Treats.

This class will look at how Waggy Tail Treats, a natural dog treat business, started and how it works. You will learn to create healthy treats for your dog and how Jamie turned this into a business. Learn about what dogs can and can't eat, and why. You will also learn how to make a healthy treat look fun and fancy for your dog. You'll even get a chance to check out the Waggy Tail Treats website and see how these treats are sold all over the United States!

Class Q: Training Man's Best Friend the "Paws"itive Way.

Discuss the "how to" of dog care and training. You'll also learn about specially trained therapy dogs and what they do.

Class R: Who Wants to Be a Zillionaire?

If you had a zillion dollars, what would you do? Would you buy everything you ever wanted? Would you save it for something special and more important? Would you share with those less fortunate? Is that your FINAL answer? We'll discuss real-life situations involving money and find out what it means to really want something and to really need something. You'll learn what money can do and how you can take charge of it yourself.

Class choices are continued on the next page.

Class S: Wonderful World of Insects.

Insects are often described as the little creatures that run the world. Over one million different species have been identified. This class will introduce how and where insects live, give you pointers on making your own insect collection, and describe some of the job opportunities that exist for people who want to know more about these six-legged creatures. Sign up, this class is crawling with fun!

Class T: The Exploding Cheeseburger!

Two all beef patties, special sauce, lettuce, cheese, pickles, onions, on a sesame seed bun -- what about the ketchup and mustard or maybe even bacon? This class will examine the cheeseburger, listing the products used to make it, explain where it comes from, and how it gets to your plate.

Class U: Nano.. Nano..

Nanotechnology is the study of extremely small things. Imagine 20 billion things fitting into a jar with room to spare. This class will demonstrate nanotechnology devices and talk about opportunities in this field. You will even get a chance to take part in hands-on experiments.

Class V: You're On in 3...2...1!

Gooooood morning radio land! Today's top news story is about Marketplace for Kids. They will be hosting an extremely fun class about radio DJs! You'll get a chance to meet these DJs and listen to them talk about what its like living life on the radio. Sign up today! Now here's another hit song from the top of the charts!

Class W: Catering to You!

Food! Yummy, tasty food! We all eat it and we all love it. Let's face it, food is fun. If you enjoy making and eating your favorite dish then this class is the one for you. Learn about catering, food preparation, and decorating. By the time this class is over you'll have an appetite for success.

Class X: Winning the Game.

North Dakota State University sophomore, Andrew Young, will share tools and skills you can use in your lives to help you succeed in all your goals. Teamwork, leadership, and accomplishing goals are just a few ideas that will be touched upon in this high energy, hands-on class. If you don't want to be sitting in a desk the whole session, this class is for you! Students will also have the opportunity to ask questions. Andrew Young was a young entrepreneur himself and would love to help anyone who has questions or ideas. If you say "yes" and sign up for this class be ready for an exciting and upbeat time!

Class Y: Not, Your Average Joe.

Brewin up money is what Dunn Brothers Coffee is all about. From harvesting and roasting coffee beans to serving up a hot cup of Joe, the Dunn Brothers do it all! Join in this exciting class to learn all about the wonderful world of coffee.

Class Z: It's All Code.

Join this class for an exploration of encryption. Students will have a hands-on experience of encrypting and decrypting a secret message for their friends. Sign up to see if you can crack the code! *(At the request of the presenter, this class size will be limited.)*

Class AA: Are You Money Smart?

This class will discuss how you can make informed decisions about money. Ideas are shared with the help of real-life stories from the presenters.

Class BB: Helping Hands.

Helping Hands is a fun and energetic class! You will learn why caring for others is important and how you can make a difference through volunteering. There is nothing like a community coming together for the good of others. During this class you will witness what other students your age have done in the community as a young volunteer and what you can do too. You might also get a chance to make something for local community shelters, senior centers, hospice clients, or others. You will leave this class feeling encouraged to make a difference in someones life that needs your help!

Class CC: Library Detectives.

The library is a wonderful place to explore, dream, and learn. Library's provide us with books that contain knowledge, experts to help us find what we need, and videos to watch. But did you know that they offer much more than that? The library puts the knowledge of the world at your finger tips. Join in as our experts tell you all about the things the library has to offer that you might not have heard about.

Class DD: Are You Prepared?

What would you do if tomorrow you had no running water, no electricity, or no heat? Would you know what to do? This happens to millions of people all around the world every year do to natural disasters. Fortunately there are things you can do today to prepare for any sort of emergency! This class will discuss the different types of disasters that occur in our area and around the world. Our experts will teach you how you can help your family be prepared. This class will also discuss the importance of volunteers during times of need.

Class EE: Digitize it!

Digital photography requires no film, no chemicals, no darkroom, and almost no processing time. Attend this class and learn all about the creative things you can do using digital photography!

Class FF: How Weather Works.

Learn how our atmosphere creates all kinds of weather with hands-on demonstrations and experiments. Our weather experts will give you the low down on low pressure systems, enlighten you about lightning and peak your curiosity about cumulonimbus!

Class GG: Careers on Wheels.

Careers on Wheels is a display of vehicles depicting occupations in your community. We see these vehicles, but rarely have a chance to view them up close or to visit with the operators. Attend this activity and get your chance! *(This will be an outdoor class. Please dress appropriately for the weather.)*

Class HH: Jr. Master Horseman.

The Junior Master Horseman (JMH) program was created to bring the world of horses into the lives of youth. In this class, you will not only learn about the JMH program but you will also see horseback riding equipment, outfits, and have the opportunity to talk with people who are experienced in the world of horses. You will learn about a variety of programs that offer involvement with horses and about basic horsemanship skills. Horse or no horse, everyone will be able to enjoy the dynamics and experience this class has to offer.
