11:00 a.m. - 11:30 a.m.	Attend Class (Non Project Students)	1:10 p.m. - 1:30 p.m.	Closing Ceremony (All Students)

Lunch: Students are required to bring their own sack lunch. A beverage will be provided. Lunches can be stored in Scott Gymnasium.

Class A: You Can Be a Successful Inventor!

The basics of becoming a successful inventor are easy and fun! It starts with a small notebook. After a while, you will find yourself moving toward an exciting career as an entrepreneur. This successful entrepreneur will show you his "SolarBee" and "TreadBlaster" inventions and describe how his company developed these products.

Class B: Check 1, 2, 3...

Join us for a fun and interactive way to learn how to successfully manage your checking account, balance a check register, and use a debit card to protect your reputation and keep your credit in good standing.

Class C: High Tech Scavenger Hunt.

It's part hiking, part scavenger hunt, and part hide-and-seek. It's as low tech as the walking stick in your left hand and as high tech as the compact global positioning system (GPS) cradled in your right. (At the request of the presenter, class size is limited to 24 students.)

Class D: We're Crude, We're Slippery and We've Got Gas.

Join the "Crude Brothers" along with their band members, 2-Methylhexane, Dimethylcyclopentane, Toluene, Cyclohexane, Hexane, and Uncle Heptane, to see if your Five Carbon Naphthenens could be dehydroisomerized into aromatics. This class is simply a gas!

Class E: Emergency! Call Us at 911.

Police, firefighters and others respond to emergencies on a daily basis. Do you have what it takes to join them? Attend this class to hear stories from their work day, and see equipment they use, and the unlawful things they find.

Class F: Create Your Own Website!

Do you have an invention or project that you think others would like? Do you have an idea for a home business? Create a web page that you can take home and discover how it can be a powerful tool to advertise your invention, project, or business! (At the request of the presenter, class size is limited to 30 students.)

Class G: Don't Mess with Meth.

Attend this class and learn more about methamphetamines and how Meth can affect your life.

Class H: Building a Community Around Your Dreams.

Everyone dreams! We dream about being teachers, doctors, gamers, engineers, attorneys, business owners, movie stars, and rock stars. We dream about what will be and what our communities will be like. Ever wonder who puts the pieces of this puzzle together as towns and cities grow? Engineers design that stuff! This interactive class will give you a glimpse of how engineers solve these puzzles and how important your dreams are in making all of this work.

Class I: The Game of Life - Playing with Your Future.

In this class you will play the Career Quest Board Game, which will encourage you to: practice being a smart saver, practice being a smart spender, learn how much education is required for different careers and realize that the choices you make today affect your future.

Class J: How the West was Won!

A representative from the ND Cowboy Hall of Fame will describe cowboy history in North Dakota. From the people to the tools, this session will show you how life was then to how it is now.

Class K: Lighten the Load.

Backpacks come in all sizes, colors, and shapes to help you express your own personal sense of style. If they are used properly, they can be a useful tool. As practical as backpacks are, they can strain muscles and joints and may cause back pain if they're too heavy or are used incorrectly. Learn tips on how you can "lighten your load."

Class L: From Idea to Successful Business.

Talk with this panel of entrepreneurs who had an idea and turned it into a successful business. Maybe your idea can lead you to your own business!
